

FULL-STACK DEVELOPER

Darya Sajjad

gorahodarya@gmail.com | [Github](#) | [LinkedIn](#) | Portfolio

Remote Only

ABOUT ME

I'm a full-stack developer who bridges the gap between clean visuals and functional code, building complete mobile applications from the ground up. Combining a background in graphic design with technical execution in TypeScript and React frameworks, I build complete, data-driven software cycles from rapid prototyping to deployment. Seeking a remote role to build products while continuing to grow as an engineer.

SKILLS

- Languages: TypeScript, JavaScript, HTML/CSS
 - Mobile/Frontend: React, React Native, Expo
 - Backend/Data: Node.js, REST APIs, SQLite, Supabase, MongoDB
 - Tools: Git / Github, Formspre
-

PROJECTS

Cross-Platform Music App - React Native, TypeScript, Expo, SQLite

- Built a mobile music player with offline audio playback and local metadata storage using SQLite, including schema design for tracks, playlists, and playback history.
- Integrated the LRCLIB REST API to fetch and parse song lyrics: sent async network requests and handled fetch failures and missing-data cases without crashing the UI.
- Implemented client-side caching so previously fetched lyrics and metadata load from local storage instead of triggering repeat network calls, reducing redundant requests.
- Structured state and data-fetching logic to keep playback stable during network interruptions, with local data persisting between app sessions.

Developer Portfolio - Astro, React, JavaScript, Vercel

- Built and deployed a personal portfolio site to showcase mobile app builds, using Astro with React components, hosted live on Vercel.
 - Integrated Formspre for contact form submissions, handling client-side validation and form state without a custom backend.
 - Organized the codebase into reusable components and kept a public development roadmap documenting in-progress and planned features.
-

EDUCATION

Bachelor of Engineering, Software Engineering

Mehran University of Engineering & Technology

2022-Present

EXPERIENCE

Graphic Design Intern

Online/Remote [IT Club]

- Assisted in creating visual content including social media posts, posters, and promotional materials
- Used design tools to produce graphics aligned with brand guidelines
- Collaborated remotely with the team to meet design briefs and deadline

Freelance Graphic Designer

Self-employed/Remote

- Designed logos and branding assets for a small business, ensuring a cohesive visual identity
 - Created commissioned digital artwork for a client based on their creative brief
 - Managed client communication, understood requirements, and delivered work independently
-

CERTIFICATES

- Foundations of User Experience (UX) Design · Google via Coursera [Dec 2025]
- Business Analysis & Process Management · Coursera [Apr 2026]
- Graphic Design Internship · [IT Club][Mar 2025]
